DETAILED ACTION

Response to Arguments

1. The examiner hereby withdraws the election of species made in the previous Office action mailed on December 22, 2004.

Allowable Subject Matter

2. Claims 40-78 are allowed.
3. The following is an examiner's statement of reasons for allowance: the examiner is unaware of any prior art which suggests or renders obvious a semiconductor light-emitting device with an active layer (having two clad layers formed on it) that is formed on a Wurtzite compound semiconductor layer such that the active layer has two wavelength regions (with its own corresponding electrode) wherein the active layer can emit two different wavelengths due to the shape of the Wurtzite semiconductor layer.
4. Fukuda (USPN 6,541,130 B2) discloses a multi-color display using organic compounds. However Fukuda does not disclose the use of a single active layer to emit light of different wavelengths. Thus Fukuda does not disclose the applicant's device.
5. Hata et al. (USPN 6,603,146 B1) discloses a semiconductor light-emitting device which emits light at different wavelengths. However this is accomplished by converting the wavelength of the light emitting from one layer by the use of fluorescent materials. Therefore Hata does not disclose the applicant's device.
